Erratum to “Accelerated lambing achieved by a photoperiod regimen consisting of alternating 4-month sequences of long and short days applied year-round” (J. Anim. Sci. 88:3280–3290)

J. Cameron, B. Malpaux, and F. W. Castonguay

doi:10.2527/jas.2010-88-11-3778

In Figure 4, panel a, the shading was incorrect in the original figure and should begin at 2230 h. The correct figure is shown below. The journal regrets the error.

![Figure 4](image)

**Figure 4.** Mean (±SEM) concentrations of melatonin (pg/mL) measured during a 24-h period in a) long day (16 h of light/d) and b) short day (8 h of light/d). Shaded box indicates the darkness period (n = 15 per photoperiod).
